Girls Home Directors, Jose is also lawyer.

August 3, 2020

Many of you have supported us faithfully. Allowing our ministry to continue. Becky and I are anxiously awaiting necessary the changes which will allow us to return to Mexico.

Since our son Bill has already survived covid19, he is in Mexico for a special meeting in Tepoztlan even as I am writing. He was not, however, allowed to go to Tlapa.

We are awaiting the final word that we can reopen the homes in a few days. It looks like the kids will return by August 28. All of our staff are working feverishly now. The school curriculum is now in the hands of our teachers. Pray about this step of faith I took and the \$4200 is on my credit card. So far \$1100 has been received

Several fundamental changes have been made to protect the children. Reverse Osmosis became the final step for water purification. We had already installed a very sophisticated filtration system. This project went over budget by about \$2000, but was necessary for the health and wellbeing of our children and staff.

New closets are being installed in all of the dorm rooms. Kitchen remodeling is complete. Stainless steel gleams everywhere.

Covid19 protection for the homes involves a sophisticated sanitation chamber with temperature check and sterile foot bathes for everyone entering the homes. This was a \$12,000 investment. We need help.

I'm praying for revival. We've stayed free from the Covid virus and covet your prayer for wisdom, provision and faith equal to our task. We so deeply appreciate your sacrifices that make this possible.

In His Love,

Mike Patterson

P.S. My health is vastly improved. Several more have dropped our personal support due to their own shortages. We covet your prayers. We are all in this crisis together but God is in control.
