M2MCare Update

Game Changer!

I've been using a wheelchair more this past year because of FSHD Muscular Dystrophy. After physical therapy and a custom-designed pair of orthotic braces, I'm now able to walk short distances, even standing while preaching and teaching. I still need the wheelchair for longer distances, but the first time I put these braces on and started walking, I kept thinking, "This is a game changer!"

Our thanks to the Physical Therapy and Orthotics teams at University Texas Southwestern Medical Center in Dallas, Texas.

A missionary family from Asia recently stayed in a cottage near us. Their father mentioned that his son had never seen **Toy Story**, so that became our evening activity.

The next morning, the little boy woke up to find Buzz Lightyear waiting for him on the porch. Thanks to **Family Fellowship** in Greenville, Texas, and your faithful support, we can do special things like this for missionary families and their children.

*Sometimes the greatest investment in missions is helping
a weary servant stay in the harvest.*
